

Table of Contents

1. Strain orthogonal decomposition implemented within the phase field method with interfacial damage to model fracture in multi-phase heterogeneous materials	386
<i>Vu Ba Thanh, Nguyen Xuan Lam, Do Anh Tu</i>	
2. Enhancing structural health monitoring of bridge beams through spectral moment analysis	400
<i>Thanh Quang Nguyen, Thuy Tien Nguyen</i>	
3. Performance evaluation of the artificial hummingbird algorithm in the problem of structural damage identification	413
<i>Nguyen Ngoc Long, Nguyen Huu Quyet, Nguyen Ngoc Lan, Nguyen Tran Hieu</i>	
4. Phase field modelling combined with optimization algorithm for maximizing the resistance in two-phase composites	428
<i>Vu Ba Thanh</i>	
5. Utilizing artificial neural networks to anticipate early-age thermal parameters in concrete piers	445
<i>Hoàng Việt Hải, Đỗ Anh Tú, Phạm Đức Thọ</i>	
6. Analytical truss model for concrete beams reinforced with FRP bars	456
<i>Tran Cao Thanh Ngoc</i>	
7. A knowledge-based decision support system for incident traffic congestion management	469
<i>Trinh Dinh Toan</i>	
8. Study on distress of airport pavement foundation and solution applied to Noi Bai international airport	484
<i>Nguyen Trong Hiep</i>	
9. Theoretical calculation of bending capacity of a steel beam - ultra high performance concrete slab composite girder	497
<i>Vinh Ha Ho, Ngoc Long Nguyen, Van Minh Ngo</i>	
10. Hydro-mechanical-damage model for the secondary creep of fiber reinforced mortar at high stress-to-strength ratio	507
<i>Pham Duc Tho, Luca Sorelli</i>	
11. Multi-task control of swarm robot with double integral model	519
<i>Le Thi Thuy Nga, Nguyen Thanh Hai, Nguyen Van Tung, Pham Xuan Tich</i>	
12. Influences of injector geometry parameters on fuel injection characteristics and parameters of a diesel engine	530
<i>Thin Quynh Nguyen, Duc Le Hoai, Dunin A.Y</i>	
13. Stability of multi-cracked fg plate on elastic foundations	544
<i>Pham Minh Phuc, Le Vinh An</i>
