

Table of Contents

1. Study of static bending of functionally graded beams using analytical method	928
<i>Nguyen Chi Tho, Vu Van Hoang, Le Hong Hai, Nguyen Huu Ha, Pham Duc Thao, Dao Minh Tien</i>	
2. Effect of groove depth on drag and aerodynamic characteristics of axisymmetric boattail models with longitudinal grooves	939
<i>Dam Vu Son Quyen, Nguyen Dinh Quang, Tran The Hung</i>	
3. Design optimization for material reduction in motorcycle brake discs	951
<i>Ngo Anh Vu, Vu Duy Duc, Tran Manh Quan, Vu Quoc Huy, Bui Van Hung</i>	
4. Vibration of four-phase bidirectional functionally graded beams based on trigonometric enriched beam element	965
<i>Vu Thi An Ninh</i>	
5. Effects of compaction parameters on compressive strength of roller-compacted concrete using ground granulated blast-furnace slag	980
<i>My Ngoc Tra Lam</i>	
6. Mechanical performance of roadcon-pema-sae-modified cement treated base in pavement applications	995
<i>Quynh Anh Bui Thi, Son Hoang Trinh, Viet Dung Dang</i>	
7. Fracture response of concrete containing carbon nanotubes under various loading conditions	1010
<i>Dang Van Phi, Pham Duc Tho, Nguyen Manh Tuan</i>	
8. An investigation of fly ash and lightweight sand on high-performance mortar	1023
<i>Nguyen Dinh Hung, Tran Ngoc Linh</i>
