

## Table of Contents

1. Determining the set of representative variables of real-world driving cycle of bus: a case study of Hanoi <i>Yen-Lien T. Nguyen</i>	317
2. The impact of leadership behavior on efficiency of the public investment management of road infrastructure: the case of Vietnam <i>Nguyen Luong Hai</i>	328
3. Evaluating the maiden BRT corridor in Vietnam <i>Huy Nghia Nguyen, Sy Sua Tu, Minh Hieu Nguyen</i>	336
4. A methodology of re-generating a representative element volume of fractured rock mass <i>Hong-Lam DANG, Phi Hong THINH</i>	347
5. A static analysis of nonuniform column by stochastic finite element method using weighted integration approach <i>Ta Duy Hien</i>	359
6. Efficiency measurement of bus routes in Hanoi city: an application of data envelopment analysis (DEA) <i>Tran Khac Duong, Do Quoc Cuong</i>	368
7. An experimental investigation of the bond behavior between the reinforcement and lightweight aggregate concrete <i>Dang Thuy Chi, Le Minh Cuong</i>	380
8. Geometric non-linearity in a multi-fiber displacement-based finite element beam model – an enhanced local formulation under torsion <i>Tuan-Anh Nguyen</i>	388
9. Measuring the success level of public-private partnership transportation infrastructure projects in vietnam using fuzzy topsis method <i>Le Dinh Thuc, Pham Phu Cuong</i>	403
10. Modeling of contact interface between two material layers in hybrid structures <i>Nguyen Thi Thu Nga, Tran Nam Hung</i>	419
11. Prediction of welding bead geometry for wire arc additive manufacturing of SS308L walls using response surface methodology <i>Van Thao Le, Dinh Si Mai, Tat Khoa Doan, Quang Huy Hoang</i>	431
12. Strengthening soft soil for approach road after abutment by cement and fly ash <i>Nguyen Dinh Hung</i>	444
