

## Table of Contents

1. A study of tensile strength of fractured rock mass by phase field method in DEAL.II with local refinement technique	737
<i>Hong Lam Dang</i>	
2. Evaluation of methods for analyzing early-age cracking risk in concrete walls of tunnel structures	746
<i>Tu Anh Do, Luan Minh Ha, Quang Thac Nguyen, Tam Duc Tran, Thang Quoc Tham</i>	
3. Overview of BIM application for bridge - highway and infrastructure projects in Viet Nam	760
<i>Ngo Thanh Thuy, Do Minh Truyen, Huynh Xuan Tin</i>	
4. Effect of ground granulated blast furnace slag and fly ash on strength, permeability, and under-water abrasion of fine-grained concrete	775
<i>Truong Van Quyet, Nguyen Thanh Sang</i>	
5. Dye sensitized solar cell (DSC) based on reduced graphene oxide (rGO)-TiO <sub>2</sub> nanocomposite photoelectrode and polyaniline (PANI) counter electrode	789
<i>Ahmed T.O., Ogunleye O.O., Abdulrahaman A.Y., Alu N.</i>	
6. Analysis of uniaxial compression behavior of hollow concrete block masonry: experimental and analytical approaches	802
<i>Bui Thi Loan</i>	
7. Development of ANN-based models to predict the bond strength of GFRP bars and concrete beams	814
<i>Thuy Anh Nguyen, Hai Bang Ly</i>	
8. Detection and localization of helipad in autonomous UAV landing: a coupled visual-inertial approach with artificial intelligence	828
<i>Hoang Dinh Thinh, Le Thi Hong Hieu</i>	
9. An approximate formula to calculate the critical depth in circular culvert	840
<i>Hoang Nam Binh</i>	
10. Using phase field and third-order shear deformation theory to study the effect of cracks on free vibration of rectangular plates with varying thickness	853
<i>Pham Minh Phuc</i>	
11. A unified framework for automated person re-identification	868
<i>Hong Quan Nguyen, Thuy Binh Nguyen, Duc Long Tran, Thi Lan Le</i>
